

2 March 1966

MEMORANDUM FOR THE RECORD

SUBJECT: Safe Requisitions

I talked to [] concerning his request for safes. He submitted a 1490 about 18 January. BSO states they have no record of [] 1490. However, they did give him [] a tentative date for delivery. Therefore, it is apparent that the BSO had received [] request. [] said that he was resubmitting a new 1490 this date.

Further, [] stated that he had talked to [] on 1 March, who stated that there were safes [] that could be observed, but they were in condition 3 therefore required work before they could be delivered to prospective customers.

In talking with [] concerning her request for safes, she reaffirmed that all the paper work had been destroyed. Nevertheless, she was quite certain that the date of her requisition was 14 February. She had been advised by Logistics, Supply, as had [] that 4-drawer safes were unavailable at the time. The safe was delivered however, unbeknown to [] to the user, on 24 February, about a week and a half after her request.

While [] and I were visiting [] Monday, 28 February, we did see some 4-drawer safes that appeared to be available. The department that handles refurbishing safes did acknowledge a backlog but the number seemed to be minimal as compared to the overall number of safes in the warehouse facility.

Noted.
